

In November 2022, the Los Angeles County Board of Supervisors established the Justice, Care and Opportunities Department (JCOD) to streamline services available to justice-impacted individuals while keeping communities safe.

The Justice Care and Opportunities Department, focuses on three main goals:

Re-Entry Services

Establishing programs for justice-impacted people, including diverting them out of the justice system at every turn, and assisting them with re-entry into society.

Empowerment

Empowering Community Based Organizations who serve vulnerable populations via training, and hundreds of millions of dollars in direct funding to those organizations.

Pretrial services

Individuals detained for non-serious, non-violent offenses get connected to services instead of jail time.
